Gaskets and Gasket sets suitable for

Chrysler | Dodge | Jeep

The ERC engine is a 3.6-litre V6 engine used in various Chrysler, Dodge and Jeep vehicles. The engine is well known as the Pentastar Engine. With a displacement of 3604 cm³, it delivers an output of 280 to 310 hp and a torque of 345 to 365 Nm. The engine block is made of aluminium and is designed as a V6, while the cylinder head is also made of aluminium and has 12 valves. The cylinder diameter is 96 mm and the piston stroke is 83 mm, giving a compression ratio of 10.2 to 11.3. The ERC engine meets the EURO 4 to EURO 6 environmental standards and has an estimated service life of around 250,000 to 330,000 km.

This engine is known for its reliability and high performance, and is therefore used particularly frequently in SUVs and other high-performance vehicles. It has a DOHC system and a dual VVT system (dual variable valve timing) that optimises the engine's performance under different operating conditions.
